WORK EXPERIENCE

Neudata *Mar 2024 – Nov 2025*

London-based data sourcing firm providing research on ~10K alternative datasets and their vendors

SVP, Product Manager

- Led a 13-person team of engineers, designers, and PMs through the 0-to-1 launch of Neudata Navigator, a SaaS platform for managing data vendor programs; landed early sales with multiple alpha clients.

Two Sigma Investment Management *2022 – Feb 2024*

Quantitative investment manager with \$58B AUM

VP, Product Manager, Data Engineering

- Drove enhancements to the in-house data catalog that researchers and modelers use to build trading models contributing to \$1.5B in P&L.
- Defined and delivered a data lineage product that engineers and support staff use to operate and troubleshoot complex production data pipelines.

Principles, LLC *2020 – 2022*

SaaS and consulting startup founded by Ray Dalio

Product Manager, People Analytics *2021 – 2022*

- Designed and implemented an analytics reporting platform on Snowflake, Tableau, and Sisense with analysts and engineers; presented findings to client C-suite teams.
- Owned technical onboarding and configuration for all new clients.

Bridgewater Associates, LLC *2000 – 2020*

Quality Assurance Manager, Trading *2016 – 2020*

- Stabilized and led the Trading QA team while retaining product management duties; outsourced QA to cut costs and scale delivery.

Solution Architect, Investment Engine *2012 – 2016*

- Primary domain and solution architect in Trading for a multi-year program delivering a dual back-office capability that independently cleared all of Bridgewater's transactions every day.
- Led product and technical enhancements across the investment engine (research, portfolio construction, trading, operations) to add new ETP/OTC execution capabilities, supporting more than \$7.5B AUM in new funds.

Technology Manager, Trading Analytics *2006 – 2012*

- Modernized the in-house trading analytics platform by integrating market data vendors (Bloomberg B-PIPE, Reuters RDF), Wombat real-time and historical market data, TIBCO EMS messaging, StreamBase event processing, and QlikView/Spotfire BI.
- Ran RFIs, vendor selection, and re-platforming; owned quality control on data modeling, financial calculations, and historical data migration.

Software Engineer, Trading Analytics *2000 – 2006*

- Built a multi-tier web reporting application delivering transaction cost analytics on all trade executions across global exchange-traded, OTC, and FX markets, supporting firm-wide efforts to reduce trading costs.

SELECTED PROJECT

Loan Default Prediction *MIT capstone, 2026*

- Compared logistic regression, decision tree, random forest, and gradient boosting on 5,960 home equity loans (Python, scikit-learn), optimizing recall on defaults given the cost of a missed default.
- Chose an explainable tuned decision tree (81% recall on defaults) to support adverse-action explanations; designed a parallel-run rollout with drift monitoring.

EDUCATION

Rensselaer Polytechnic Institute

BS Computer Science, 2000

Minor, Psychology

CERTIFICATIONS

MIT Professional Education

Applied AI and Data Science Program, 2026

Applied Agentic AI for Organizational Transformation

FINRA Series 3

TECHNICAL SKILLS

Applied AI / ML

RAG, agentic workflows, LLM and model evaluation; scikit-learn, TensorFlow, pandas

Languages

Python, SQL, C#, C/C++, Java, Scala

Databases

PostgreSQL, MS SQL Server, Snowflake, Databricks

Cloud & DevOps

AWS (RDS), Kubernetes, CircleCI, Git, Jira, PagerDuty

Analytics

Tableau, Sisense, Spotfire, QlikView, D3

FINANCIAL DOMAIN

Market Data

Bloomberg B-PIPE, Reuters RDF, Wombat

Trading & OMS

Charles River, FlexTrade, FXall, MarketAxess, Tradeweb, broker algos

Data & Clearing

Markit MDM

Instruments

FX, futures, equities, bonds, options, swaps

Protocols

FIX, SWIFT, FpML

INTERESTS

Eagle Scout

President (charity), Staples Tuition Grant
